

CodesRock Labs

Pitch Deck

Screen-free coding for kids

Raising \$100,000 to scale and grow →

Presented By:
**Ellen Swatson Hall
& Triumph Tetteh**

Problem

Post-pandemic, screen time for young kids has surged—often doubling—and it's harming their development: shorter attention spans, less physical play, delayed social skills, and health risks, as warned by the WHO and global experts

In Ghana/Africa, only ~5% of preschools integrate computational thinking due to resource shortages and teacher training gaps.

Codesrock Labs
An Edtech company

We empower children ages 3+ with foundational coding, AI, and robotics skills through entirely screen-free, hands-on activities. No devices—just joyful play with activity books, Play-and-Code robots, flashcards, songs, and interactive kits that build logical thinking, debugging, creativity, and holistic development. We also train teachers so schools can deliver it seamlessly.

Solution

A comprehensive screen-free but technology driven coding, AI and robotics education system for preschools.

Is your preschool
curriculum
future-ready?

Codesrock Labs

Unique Selling Point

Unplugged

Our solution is infrastructure independent in the classroom: no electricity, no internet, no computers.

ROI

Conscious Parents and Schools see undeniable returns and solves their pain point

B2B2C

Our model uses the parent as a Trojan Horse(advocate) which drastically lowers our customer aquisition cost.

Codesrock Labs

Product Ecosystem

School Centric →

Comprehensive Training & Resources for Educators

Unplugged Games

Interactive Robot

DEMO

Target Market

Primary market:

Preschools and early learning centers (B2B)

Secondary market:

Parents (B2C) for home use via direct sales

Segmentation:

urban/suburban first, then rural; low to mid income next.

Go-to-Market

Partnerships with schools, social media and events for parents; 70% B2B revenue, 30% B2C revenue

Codesrock Labs

Market size

Big Picture

TAM for CodesRock: \$20B+ African edtech by 2035; early childhood segment primed for innovation

Small Picture

Minimum Private school market size achievable is 0.1Billion+ of revenue in GHS in Ghana

Revenue Model

School Centric →

Comprehensive Training & Resources for Educators

Onboarding
schools

programming tools

Yearly Activity books

Training and support
revenue after 3 years FREE

Product Roadmap

Long Term Impact →

CODESROCK: OUR EVOLUTION JOURNEY

Empowering the Next Generation of Coders

SHORT-TERM (Next 6 Months)

- Onboard 15-20 Schools
- Pilot CodesRock 2: Advanced Sequences conditionals, launching our own rown r robot called RockBot robots

MEDIUM-TERM (6-17 Months)

- Launch CodesRock 3: AI Adventures
- Modular Sensors RockBot 2 – AI Bot (e.g., robotics ethics kits)

LONG-TERM (11+ Months)

- International Versions and Partnerships
- Certifications for Global Standards

Building a scalable system for long-term impact

- Short-Term (Next 6 Months): Onboard 15-20 schools; pilot CodesRock 2: Advanced Sequences (loops, conditionals, launching our own robot called RockBot).
- Medium-Term (6-18 Months): Launch CodesRock 3: AI Adventures; add modular sensors for machine learning basics; expand activity lines, RockBot 2 – AI Bot (e.g., robotics ethics kits).
- Long-Term (18+ Months): International versions and partnerships; certifications for global standards.

Traction

- Adopted by Mohdlana Preschool (first client) and afterschool pilots; also Vine Christian School, Eden International School, Goshen Light Academy
- Impact: Kids show 30%+ gains in problem-solving/logic; teachers report higher engagement and easier integration.
- Metrics: Tracked via activity books (child progress) and portal (teacher/school performance); positive feedback on creativity boost.

Early Revenue: \$2,800 from onboarding, tools, and books through our first client and pilots in the past 6 months

30%
gains

500+
student pilots

Ellen Ekua Swatson Hall –

Ellen is an experienced early childhood education specialist with a deep passion for child-centered, play-based learning. She drives CodesRock Labs' vision, teacher training programs, and school partnerships, ensuring our curriculum aligns with global and Ghanaian standards while prioritizing holistic development.

Triumph Tetteh –

Triumph is the innovative force behind CodesRock's product ecosystem, leading the design and development of our screen-free tools—from the original activity books and Play-and-Code robots to upcoming sequels, modular upgrades and teacher training software. With years of hands-on edtech experience from Starters Technology, he focuses on creating engaging, scalable solutions that teach coding and AI concepts through joyful play.
