MODULE GUIDE

DILIGENCE MODULE

Module Lead: Design Thinking Ghana Hub

INTRODUCTION

Design is a transformational force that helps organizations develop products, services and experiences that connect and resonate with customers. This enables meaningful and emotional differentiation in the eyes of consumers. Not surprisingly, design has become increasingly important in business circles and organizations are increasingly trying to understand and master the competitive advantage design can offer. To help your startup address today's business challenges in innovative ways, business leaders are seeking to develop their creative and design thinking skills.

KEY MODULE BENEFITS

- Master the skills you need to sustain creative and design thinking capabilities
- Equip you with a methodology to put design thinking into action
- Learn how to solve problems creatively in any setting by collaborating with design coaches
- Action Learning Project to apply the learning in your personal or your organization's context.

Topics covered in this module:

- Market And User Research
- Design Thinking
- Prototype Development
