

Module 3 - Business

Introduction

In the business module, participants are building on their experiences and learnings from the Diligence and Product modules to grow their ventures. They will have the opportunity to explore different business and revenue models and determine which is right for their businesses. They will also now be able to scan the market for competition, analyze their relative strengths and weaknesses and determine how to position themselves to better compete.

Module Themes

This module covers the following general themes:

1. Develop an understanding of competitive positioning of products and their companies
2. Develop their sales and marketing capacities: go-to-market, growth hacking and customer retention

Module Topics

Topics covered in this module:

1. Business modeling
2. Revenue models
3. Revenue models
4. Competition analysis
